

Case Study—Warburtons

Warburtons Bakers, Bolton & Runcorn, 1998-2004
Contract Values from £3k—£25k

Bel Aircon is a major supplier, installer and maintenance provider to Warburtons bakeries. Various projects have been undertaken at sites in Bolton and Runcorn. These include:

- An on-going program of design and installation within office facilities, public areas including visitor facilities and cafeterias, various factory locations and laboratories. Installation has been carried out by sectors and to individual rooms over the last 2 ½ years as areas become available.
- The relocation of existing units to accommodate factors such as new building work and re-organisation of existing spaces.
- A full, contracted maintenance service covering equipment installed by ourselves and others, including Mitsubishi, Daikin, Toshiba, Airwell and Qualitair. Our engineers make regular planned visits to ensure all systems remain fully operational and perform to their optimum. They also provide call out within hours should a problem arise.
